

AMENDMENTS TO THE SPECIFICATION

Please replace the Paragraph beginning on Page 1, Line 15 with the following paragraph rewritten in amendment format:

Conventionally, a variety of types of fan units have been used. One type of fan unit has been proposed by Japanese Patent Laid-open No. ~~44-218098~~ 11-218092, in which a compact fan with a brushless compact DC motor is explained. Specifically, the fan unit is made compact to the extent of allowing the fan unit to be directly disposed on, for example, a printed wiring assembly. This fan unit has a feature that a brushless DC motor driving a fan wheel is provided as a single-phase single-winding gearing-pole type of motor provided with a non-feedback permanent magnet rotor and at least one magnet for positioning is placed to exert an influence on an activating position of the rotor.
